DCR hand roller

The DCR hand roller efficiently removes particles and dust from object surfaces.

Hand dispenser for adhesive roll

The handle for glue rolls is suitable for glue rolls with a diameter of 38 mm and a width of 160 - 200 mm. This is available with a length of 295 mm and with a telescopic handle with a length of 640 - 1110 mm.

The **DCR base station** is made of ABS and serves as a base for the DCR pads. These are clamped with a screw cap, so that a secure hold is guaranteed. The DCR hand roller can also be placed on the base station.

The **"DCR Pad"** with 50 layers of special paper is used to remove dust from the DCR hand roller. This is rolled over the surface of the pad until all the dust and particles have been transferred to the pad and the hand roller can then be used again.
